EXPERIENCE

Amazon Ads

Santa Monica, CA

Software Development Engineer (Apprentice)

Oct 2022 - Mar 2024

Advertising systems supporting campaign metrics and advertiser fund distribution.

- Designed and optimized distributed systems processing millions of records daily to improve reliability and efficiency of advertiser fund distribution systems.
- Owned development and maintenance of distributed serverless pipelines using AWS Lambda, SQS, S3, VPC, and CDK to process high-volume advertising data.
- Refactored legacy Java and TypeScript across multiple services to improve performance, reliability, and long-term maintainability of advertising infrastructure.
- Partnered with product and UI/UX teams to enhance TypeScript front-end workflows, reducing user friction and improving load times.
- Implemented automated testing, monitoring, and deployment safeguards to support reliable production releases.

Amazon Technical Academy (ATA)

Lake Wales, FL (Remote)

ATA Participant

Feb 2022 - Oct 2022

Highly selective paid internal software engineering training program for Amazon employees transitioning into technical roles.

- Trained in Java, data structures, algorithms, distributed systems, object-oriented design, and software engineering best practices through a full-time software engineering curriculum.
- Applied software engineering practices modeled after Amazon development workflows through hands-on projects using object-oriented design, testing, and AWS services.

Oregon State University

Los Angeles, CA (Remote)

Undergraduate Learning Assistant

Mar 2026 - Present

CS 225: Discrete Structures in Computer Science

- Lead virtual office hours, translating logic, proof techniques, and set theory into clear problem-solving strategies
- Grade discrete mathematics assignments and provide actionable feedback on students' logic, proof structure, and solution approaches

EDUCATION

Oregon State University

Corvallis, OR

Bachelor of Science in Computer Science | GPA: 4.0

Expected Dec 2027

- Relevant Courses: Discrete Structures, Data Structures, Computer Architecture & Assembly Language, Web Development

University of South Florida

Tampa, FL

Bachelor of Science in Health Sciences

Aug 2013 - May 2018

PROJECTS

Drop in Chess | *Java, Spring Boot, React, TypeScript, REST APIs*

- Developed a full-stack chess application with a React/TypeScript frontend and Java Spring Boot backend, using REST APIs to create, restore, and manage game sessions.
- Designed a server-authoritative game architecture using Chesslib to validate moves and maintain game state, with session restoration and client-server state synchronization.
- Implemented layered backend architecture with controllers, services, and DTOs, alongside frontend error handling and automated tests for core application behavior.

Devfolio Website | *Next.js 15, TypeScript, Tailwind CSS, Framer Motion*

- Developed a responsive portfolio with dynamic hero sections, tooltips, and custom animations.
- Deployed on Vercel with GitHub Actions enabling automated CI/CD workflows.
- Implemented secure backend data storage with Supabase to persist contact form submissions and visitor messages.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, C++, HTML/CSS

Frameworks & Tools: Spring Boot, React, Next.js, AWS, Docker, Git, PostgreSQL

Concepts: REST APIs, CI/CD, Distributed Systems, Object-Oriented Design, Unit & Integration Testing
