EXPERIENCE

Amazon Ads

Santa Monica, CA

Software Development Engineer (Apprentice)

Oct 2022 – Mar 2024

Developed backend systems supporting advertiser metrics and fund distribution decisions.

- Designed and optimized distributed systems processing millions of records daily to improve reliability and efficiency of advertiser fund distribution systems.
- Owned development and maintenance of distributed serverless pipelines using AWS Lambda, SQS, S3, VPC, and CDK to process high-volume advertising data.
- Refactored legacy Java and TypeScript across multiple services to improve performance, reliability, and long-term maintainability of advertising infrastructure.
- Partnered with product and UI/UX teams to enhance TypeScript front-end workflows, reducing user friction and improving load times.
- Implemented automated testing, monitoring, and deployment safeguards to support reliable production releases.

Amazon Technical Academy (ATA)

Remote

ATA Participant

Feb 2022 – Oct 2022

- Completed full-time, paid upskill software engineering program focused on Java, data structures, algorithms, distributed systems, and software engineering best practices.
- Built production-style applications using object-oriented design and AWS services

Amazon Fulfillment

Lakeland, FL

Learning Ambassador/Amazon Associate

Dec 2020 – Feb 2022

- Trained and mentored associates in high-volume outbound operations while exemplifying Amazon Leadership Principles
- Selected for Amazon Technical Academy, a competitive internal software engineering program (sub 1% acceptance rate)

Oregon State University

Remote

Undergraduate Learning Assistant - Discrete Structures in Computer Science

Mar 2026 – Present

- Support student understanding of logic, proofs, sets, functions, and discrete mathematical reasoning
- Facilitate office hours and provide guidance to students

EDUCATION

Oregon State University

Corvallis, OR

Bachelor of Science in Computer Science

Expected Dec 2027

- Completed CS 161 & CS 162 Intro To Computer Sciences 1 & 2 and CS 225 Discrete Structures — **4.0 GPA**.
- Current: CS 261 Data Structures & CS 290 Web Development - Expected completion June 2026

University of South Florida

Tampa, FL

Bachelor of Science in Health Sciences

Aug 2013 – May 2018

PROJECTS

Email Sorter | Python, Gmail API, Supabase (PostgreSQL), YAML

- Built a modular, rule-based email classification system integrating Python, Gmail API, YAML-based rules, and Supabase logging.
- Designed extensible architecture to support future AI-assisted categorization, Dockerization, and CI/CD deployment.

Devfolio Website | Next.js 15, TypeScript, Tailwind CSS, Framer Motion

- Developed a responsive portfolio with dynamic hero sections, tooltips, and custom animations.
- Deployed on Vercel with GitHub Actions enabling automated CI/CD workflows.
- Implemented secure backend data storage with Supabase to persist contact form submissions and visitor messages.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, HTML/CSS

Frameworks & Tools: AWS (Lambda, S3, SQS, VPC, DynamoDB, CDK), React, Docker, Git, CI/CD, Unit & Integration Testing

Concepts: Data Structures & Algorithms, ELT Pipelines, Cloud Architecture, Object-Oriented Design
